 - ★ (3) Integration -- maximizing partnerships **Res**
 - ★ (4) Alignment -- horizontal and vertical process alignment **IG Prep**
 - ★ (5) Covenant Leadership -- taking care of ship and crew **Award & Mentor Programs**

Military Health System — Measures for Success

THE ASSISTANT SECRETARY OF DEFENSE

A set of performance measures aligned with our strategic priorities.

Each of our measures provides important and regularly scheduled assessments of our system performance — in medical readiness, health care quality, efficient use of resources, and customer satisfaction.

- ★ *Individual Medical Readiness.***
- ★ *Satisfaction with Telephone Access.***
- ★ *Satisfaction with the Health Plan.***

Military Health System — Measures for Success

★ *Individual Medical Readiness.*

- Dental readiness. All Services use the same classification system to assess and monitor dental readiness.
- The IMR of each Service member will be assessed according to the following system:
 - Fully medically ready = current in all categories including dental class 1 or 2.
 - Partially medically ready = lacking only immunizations, readiness laboratory studies, or medical equipment.
 - Not medically ready = deployment limiting condition (including those hospitalized or convalescing from serious illness or injury), or dental class 3.
 - Medical readiness indeterminate = inability to determine health status because of missing health record, overdue periodic health assessment or dental class 4.
